SUMMARY

Passionate and self-taught Full Stack Developer with a strong foundation in frontend and backend technologies like HTML, CSS, JavaScript, React, PHP, Laravel, and MySQL. I have built multiple real-world projects, developed strong problem-solving skills, and continuously upskill through hands-on practice and online learning. Seeking an internship to contribute to a development team while further enhancing my technical and collaborative abilities.

EDUCATION

Bachelor of Arts (B.A.)

School of Open Learning Unversity

📅 04/2020 - 04/2023   📍 New Delhi, India

SKILLS

Client-Side

HTML   CSS   JS   Jquery   React   Tailwind

WordPress   Bootstrap

Server-side

MySQL   Core PHP   Laravel   CodeIgnitor   Rest API

Cake

Development & Operations

GITHUB   GIT   POSTMAN   XAMPP

EXPERIENCE

Full Stack Developer Trainee

Heights Institute

📅 12/2023 - 12/2024   📍 Nangloi, Delhi

Completed a hands-on Full Stack Developer course that provided practical training in building full web applications using frontend and backend technologies like HTML, CSS, JavaScript, React, PHP, Laravel, and MySQL. Strengthened problem-solving skills, UI/UX understanding, and real-world project development experience..

- Built full-stack applications as part of course projects using React and Laravel.
- Learned to integrate frontend and backend with RESTful APIs.
- Developed CRUD operations, user authentication, and admin dashboards.
- Implemented responsive UI using Tailwind CSS and Bootstrap.
- Worked with MySQL database design and query optimization.
- Gained hands-on experience with Git and version control workflows.

STRENGTHS

Quick Learner

Able to pick up new technologies and tools swiftly, always eager to expand knowledge and improve coding practices.

PROJECTS

Anime Nebula

🔗 https://github.com/yashsharma-dev/Anime/tree/main

AnimeNebula is a web platform that allows users to explore and manage anime series, with details like descriptions, ratings, and genres. Built with **React** for dynamic frontend and **Laravel** for backend API management, it uses **MySQL** for data storage and **Tailwind CSS** for a responsive, modern UI

- ⚙️ **CRUD Operations:** Admins can add, update, and delete anime entries with ease.
- ⚙️ **Backend API (Laravel):** Built with RESTful API for handling anime data, ratings, and user actions.
- ⚛️ **React Frontend:** Fast, dynamic UI rendering with React components.
- 🔐 **Authentication:** Secure user login/registration using Laravel's built-in auth system
- 🔀 **State Management:** Used React's state management to maintain user preferences and filter options.
- 🏆 **Responsive Design:** Optimized for both desktop and mobile users with Tailwind's utility-first classes
- ⚙️ **Admin Panel:** Manage restaurant profiles, menu items, and view order history

Etrade

🔗 https://github.com/yashsharma-dev/Etrade/tree/master/Etrade

E-Trade is a dynamic e-commerce platform built entirely using **Laravel**, focusing on seamless product browsing, cart management, and order placement. It includes a secure user authentication system and a robust admin dashboard to manage products and track orders.

- 🛒 **Cart System:** Add to cart, update quantity, and checkout functionality.
- 💼 **Database Management:** Designed scalable MySQL schema for users, products, and orders.
- 🎨 **Responsive Design:** Frontend styled with Bootstrap for a mobile-friendly layout.
- 🔀 **MVC Structure:** Built following Laravel's clean MVC architecture for maintainability
- 📦 **Order Tracking:** Real-time tracking of orders from placement to delivery
- 🚚 **Order Management:** Allows customers to modify and cancel orders, track delivery status through real-time updates
- 🔐 **Authentication:** Secure user login/registration and session management using Laravel's authentication system

FoodOnline

🔗 https://github.com/yashsharma-dev/FoodOnline

Food delivery app built with **React** and **Laravel**, authorization and an filter intems. Responsive UI with **Tailwind CSS**.

- 🍔 **Restaurant Listings:** Browse a wide variety of restaurants with dynamic filters by cuisine, rating, and location
- 🔐 **Authentication:** Secure user login/registration and session management using Laravel's authentication system
- ⚛️ **React Frontend:** Dynamic, fast user interface with React components and hooks for state management

STRENGTHS

Strong Problem-Solving Ability

Excellent at troubleshooting and finding efficient solutions to complex issues in both frontend and backend development.

Adaptability

Comfortable working in diverse tech stacks and project environments, able to adjust to new challenges and requirements.

Team Player

Collaborative and open to feedback, always willing to contribute to group efforts while learning from peers.

Effective Communication

strong written and verbal communication skills, able to explain technical concepts in simple terms for non-technical stakeholders.

PROJECTS

Etech

🔗 https://github.com/yashsharma-dev/Etech

An educational web platform built with **HTML**, **CSS**, and **JavaScript** for delivering online lessons and resources. Provides interactive learning features with a responsive, user-friendly design.

- **Responsive UI:** Developed using **HTML**, **CSS**, and **JavaScript**, with a mobile-friendly interface.
